

What is claimed is:

1. A bassinet, comprising an accommodating portion, wherein the bassinet is supported on a baby play yard, and the accommodating portion is connected to the underneath of the bassinet and configured to define an accommodating space for receiving articles.

2. The bassinet according to claim 1, wherein an opening is provided on the play yard at a position corresponding to the accommodating portion, so that it is convenient for a user to take out the articles received in the accommodating portion.

3. The bassinet according to claim 2, wherein a cover is provided on the opening, and at least one fixing means is provided between the periphery of the cover and the inner edge of the opening for opening and closing the opening.

4. The bassinet according to claim 3, wherein the fixing means is Velcro, hook, button, zipper or the like.

5. The bassinet according to claim 1, wherein at least one fixing means is provided on the accommodating portion for securely fixing the accommodating portion under the bassinet.

6. The bassinet according to claim 5, wherein the fixing means provided on the accommodating portion is Velcro, button, hook, zipper or the like.

7. The bassinet according to claim 1, wherein the accommodating portion is substantially formed as a rectangular parallelepiped.

8. The bassinet according to claim 1 or 7, wherein the accommodating portion is provided with at least one partition for dividing the interior of the accommodating portion into a plurality of compartments for receiving articles.
